

# 2011 Master Builders & Boral Excellence in Building Awards

Building something great™

MASTER BUILDERS AUSTRALIAN CAPITAL TERRITORY

**Chief investment:** Kitchens are often the heart of family life.

## The path to a perfect kitchen

YOU will spend more time in your kitchen than any other room in your home, so it needs to be functional and comfortable.

Installing a custom designed quality made kitchen in a new home or renovation will increase your enjoyment of your kitchen and the value of your home enormously.

Kitchens, laundries and bathrooms are often the determining factor when purchasing a home.

With such a significant item in both the comfort and asset in your home why would you select anything less than the best design and quality workmanship?

Oppikofer Joinery strives to achieve the best possible outcome for its clients by producing the best possible design and incorporating the highest quality craftsmanship in the manufacturing and installation process.

To achieve this, Oppikofer uses state-of-the-art computerised wood working equipment which is capable of producing joinery components to an accuracy not possible when using

conventional methods.

Oppikofer believes word of mouth is the best pathway to success and the only way to achieve this is by producing a quality product on time and on budget.

It is not the intention of Oppikofer to become the largest manufacturer of kitchens and bathroom joinery – but it strives to be the best. Oppikofer will not be the cheapest available, but will deliver the best quality product and value for money in the custom made joinery market.

As recognition of this quality, Switzerland's high profile domestic appliance manufacturer V-Zug in conjunction with the Appliance Gallery Fyshwick selected Oppikofer Joinery to build their new display.

Oppikofer Joinery's managing director, Beat Oppikofer completed a cabinet-making apprenticeship and a bachelor of wood engineering and technology in Switzerland before emigrating to Australia.

Beat oversees all the company projects personally.

## A design philosophy rich in superlatives

BOASTING 17 years in the industry focusing mainly on bathrooms and renovations, it comes as no surprise that Wayne Goodwin Building Services won the award for bathroom design and construction at the 2011 Master Builders & Boral Excellence in Building Awards.

It's the third Master Builders Association award the local, family-owned business has won since Wayne Goodwin and his wife established it in 1998.

Mr Goodwin said the success of the company was a philosophy rich in superlatives: the best materials, the best workmanship, innovation in design and unbeatable customer service.

It may seem a tall order, but Mr Goodwin said that's the way it works.

"Our business philosophy is if we're going to do the job, we've got to do it properly," he said.

"We offer clients quality tradesman service and always keep budgets in mind.

"Focus on detail is definitely one of our strengths."

Testament to this is the company's continuous repeat clientele.

"We work on a referrals basis only," Mr Goodwin said.

Mr Goodwin completed his apprenticeship through the Master Builders ACT and then went on to acquire his

trade certificate in carpentry and achieving his builder's license.

Since its inception, his company has expanded progressively and diversified into full house renovations and extensions while maintaining a specialisation in bathrooms.

The brief on the award-winning ensuite bathroom good storage and space while keeping smooth, straight lines with opulent fittings.

A seamless marriage between aesthetic and functionality was maintained throughout with meticulous attention to detail.

The outcome was a bathroom worthy of recognition from the Master Builders ACT.
